DETAILED ACTION

This application claims the benefit of the filing date of provisional application 60/212,998.

Claims 9-17 and 19-23 have been canceled.

Claims 1-8 and 18 are currently pending and are the subject of examination in the present Office Action.

In view of Applicant's amendment filed February 17, 2004 no outstanding grounds of rejection have been maintained.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

1. Claims 1, 2, 5 and 18 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. This is a NEW MATTER rejection.

Claims 1 and 5 have each been amended to recite the phrase "such that [DE](2) represents DD, EE, DE, or ED." The recitation is not fully supported by the specification or claims as originally filed. Applicant asserts that "[t]here are no statements in the specification that limit this element" on page 15 of the response filed February 17, 2004. equally, there are no statements in the specification that fully support the claimed element. Applicant asserts that Table 1 on page 15 discloses [DE](2) as EE and Table 2 on page 16 discloses [DE](2) as ED. Applicant asserts that these disclosures, due to the lack of a specific limitation of the element, support DD and DE as being within the scope of the claims. However, given that all examples in Table 1 (SEQ ID NO: 2-27) comprise the "EE" motif and all examples in Table 2 (SEQ ID NO: 28-52) comprise the "ED" motif and there is no suggestion in the specification regarding "DD" or "DE" there is no support for the recitation of these motifs in the claim and their presence in the claims constitutes new matter. The only embodiments that have support in the specification or claims as originally filed are those where [DE](2) has a glutamic acid residue in the first of the two positions.

Art Unit: 1644

Allowable Subject Matter

2. Claims 6-8 are allowed.
3. Claims 3 and 4 stand as being objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
